HermansQualityMeats.com

At Herman's we pride ourselves in our flexibility of hand trimming any cut to provide our customers the finest end product. Listed for your reference are the common muscle names for many of our popular selections followed by their alternate regional names in quotes. A "roast" is the whole muscle, while a "steak" or "chop" is a cut from the muscle. Our "ground" meats are only ground once or twice to preserve the flavor of the meat.

BEEF

Each week our meats are hand selected from 18-20 month old steers and dry aged 2-4 weeks to maximize the flavor and tenderness. Our USPA Wide 2 Choice and Prime Angus cattle are grazed in the Eastern Shore area with a corn and alfalfa feed supplement to provide marbling. Some cattle are available without the use of antibiotics and growth hormones.
